Robin's Blog Data sources for parameterising Radiative Transfer Models & atmospheric correction algorithms June 8, 2016. There was a question recently on the Py6S mailing list about what data sources are best to use to provide atmospheric parameters (such as AOT, water vapour and ozone) for use with 6S, other atmospheric Radiative Transfer Models (such as MODTRAN) or other atmospheric ... <http://blog.rtwilson.com/data-sources-for-parameterising-radiative-transfer-models-atmospheric-correction-algorithms/>

Albedo - Wikipedia Albedo (/ æ l ɪ b i d oʊ /) (Latin: albedo, meaning "whiteness") is the measure of the diffuse reflection of solar radiation out of the total solar radiation received by an astronomical body (e.g. a planet like Earth). It is dimensionless and measured on a scale from 0 (corresponding to a black body that absorbs all incident radiation) to 1 (corresponding to a body that reflects all ... **ACP - Recent Atmospheric Chemistry and Physics** An interactive open-access journal of the European Geosciences Union Recent research on aerosol forcing of the CMIP5 models ... by Frank Bosse *A few days ago a paper (Sato et al) dealing with some aspects of the "Aerosol Cloud Interactions", (ACI, also called "aerosol indirect effects") was released. It bolsters the conclusions of earlier papers: the effective radiative forcing from ACI (ERFaci) is smaller than thought, perhaps near zero . John and I predicted this would be the case fully 7 months ago, when we called 2015 as the winner.. In contrast, our satellite analysis has 2015 only third warmest which has also been widely reported for weeks now. I understand that the RSS satellite analysis has it 4th warmest. **Man Made Global Warming Disproved - Joanne Nova** It takes only one experiment to disprove a theory. The climate models are predicting a global disaster, but the empirical evidence disagrees. The theory of catastrophic man-made global warming has been tested from many independent angles.
