Wireless ad hoc network - Wikipedia A wireless ad hoc network (WANET) or MANET (Mobile ad hoc network) is a decentralised type of wireless network. [2] [3] The network is ad hoc because it does not rely on a pre-existing infrastructure, such as routers in wired networks or access points in managed (infrastructure) wireless networks. [4] PHY/MAC Layer Design in Vehicular Ad Hoc Networks ... In the last few years, vehicular ad hoc networks (VANETs), which provide connectivity among vehicles and between vehicles and the roadside infrastructure, have aroused the increasing interest of the research community (Huang, 2010), (Olariu & Weigle, 2009), (Wafra, 2010).
